

Interview Summary

An interview was conducted with Examiner Deng and SPE Zhien on May 7, 2008.¹

The Examiners are thanked for their time and their courtesy. Agreement was reached that Gere does not teach the claimed inventions. As explained by Mr. Groover, Gere transfers the operating system which requires a reboot. The invention claimed in (e.g.) Claim 1 transports an operating environment, not a complete operating system.

¹ Applicant's attorney had also travelled to the Patent Office for scheduled interviews in this case on March 5th and April 3rd, but no signatory Examiner was present. Thus, the interview on May 7 was the first interview in compliance with the MPEP.
